

Advanced JavaScript Mini Projects

Projects designed after completing HTML, CSS, JavaScript, DOM, Local Storage, ES6 Features, Modules, Async JavaScript, Promises, Async/Await and Fetch API.

Mini Project 1: DevConnect - GitHub Developer Explorer

Real Life Scenario:

Recruiters want to quickly analyze developers before scheduling interviews.

APIs:

<https://api.github.com/users/{username}>

<https://api.github.com/users/{username}/repos>

Requirements:

- Search developer by username
- Display profile image, bio, location
- Display followers, following and repositories
- Show repository stars, forks and language
- Recent search history using Local Storage
- Loading spinner and error handling

Concepts:

Fetch API, Async/Await, Promises, Local Storage, Modules, DOM Manipulation.

Mini Project 2: YouTube Explorer (YouTube Clone)

Real Life Scenario:

Build a simplified YouTube platform where users can search videos and watch content.

API:

YouTube Data API v3

<https://developers.google.com/youtube/v3>

Suggested Endpoint:

<https://www.googleapis.com/youtube/v3/search>

Objective:

Create a YouTube-inspired application with a professional UI similar to YouTube.

Features:

- YouTube style homepage
- Search videos
- Display video thumbnail
- Display title
- Display channel name
- Display publish date
- Open video in watch page
- Suggested videos sidebar
- Recent search history using Local Storage
- Responsive UI

Watch Page:

- Embedded YouTube video
- Video details
- Related videos

Bonus Features:

- Dark Mode
- Category filters (Music, Coding, Gaming, News)
- Infinite scrolling

Concepts:

Fetch API, Async/Await, Promises, Modules, DOM Manipulation, Local Storage.

Mini Project 3: CineVerse - Movie Discovery Platform

Real Life Scenario:

Users spend a lot of time searching for movies before deciding what to watch.

API:

<https://www.omdbapi.com/>

Example:

<https://www.omdbapi.com/?apikey=thewdb&s=batman>

Requirements:

- Search movies

- Display movie poster
- Display title and year
- View complete movie details
- Save favourite movies
- Search history using Local Storage
- Responsive UI

Movie Details:

- Poster
- Title
- Release Year
- Genre
- Runtime
- Actors
- IMDB Rating
- Plot

Concepts:

Fetch API, Async/Await, Promises, Local Storage, DOM Manipulation.
